ATC Introduces the 550L Series Ultra-Broadband Capacitor (UBC)™

October 5, 2009, Huntington Station, NY ------- ATC is pleased to introduce the 550L Ultra-Broadband Capacitor (UBC). This product has been designed and manufactured with the highest quality materials to provide reliable and repeatable Ultra-Broadband performance from 16 KHz through 40+ GHz. This unique component provides ultra-low insertion loss, flat frequency response and an excellent match over multiple octaves of frequency spectrum.

The 550L has been engineered in a one piece orientation-insensitive 0402 SMT package, making it fully compatible with high speed automated pick-and-place manufacturing operations. Its superior broadband performance and reliability make it ideal for the requirements of the most stringent Ultra-Broadband applications.

**Typical Applications:**
- Optoelectronics / High Speed Data
- Transimpedance Amplifiers
- ROSA / TOSA
- SONET
- Broadband Test Equipment
- Broadband Microwave/millimeter-wave

**Features:**
- EIA 0402 Case Size
- 16 KHz to 40+ GHz
- Insertion Loss: < 0.5 dB typical
- Orientation Insensitive
- One Piece Construction
- RoHS Compliant Terminations

**Advantages:**
- Ultra-Broadband Performance
- Ultra-low Insertion Loss
- Flat Frequency Response
- Excellent Return Loss
- Unit-to-Unit Performance Repeatability
