Quadband 850/900/1800/1900MHz GSM/GPRS Industrial Modems

The Maestro 100 Evolution series is the perfect solution for demanding M2M applications. Compact and fully featured, the M100 can easily be integrated into industrial applications, such as electricity meters, vending machines or intrusion alarms.

The M100 is based on the Sierra Wireless WMP100 module that supports full OpenAT™ application development on board. It operates on 6-32V DC power source. The M100 has been certified for use in most markets worldwide!

Also available in CDMA and approved on Verizon, Sprint, and Aeris networks.
